EDUCATION

Seneca College, Toronto, Ontario   **December 2024**
*Advanced Diploma in Computer Programming & Analysis (**Honours**)*   *GPA: 3.8 / 4.0*
- **Relevant Coursework:** Data Structures and Algorithms, Web Development using React, Object Oriented Programming

EXPERIENCE

City Of Vaughan   **Vaughan, Ontario**
Student Co-op   *May 2023 - Dec 2023*
- Developed and maintained features for large full-stack web applications using C#, .NET, Bootstrap, HTML/CSS, and JavaScript, ensuring seamless functionality and performance.
- Communicated with clients and stakeholders to gather requirements, define project scope, and set accurate expectations.
- Attended business request meetings to track and update project records, maintaining transparency and alignment with business needs.
- Leveraged Power Apps, Power BI, and Power Automate to rapidly develop solutions, accelerating project delivery and meeting client demands efficiently.

U-Haul   **Ajax, Ontario**
Reservation Manager   *April 2022 - Present*
- Assisted with inbound and outbound customer calls, ensuring prompt and effective communication.
- Supported field team members and ~40+ U-Haul dealerships with equipment and reservation management.
- Reviewed reports to analyze equipment placement, customer reservations, and contracts, enhancing availability and accuracy.

PROJECTS

Portfolio Website
- Created a mobile-first, fully responsive portfolio that adapts seamlessly to various screen sizes and devices.
- Leveraged React to build a dynamic, interactive user interface with smooth navigation and state management.

FreelanceU
- Developed a modern freelancing platform using React.js and Styled-Components, achieving seamless user experience.
- Integrated AWS Cognito for secure authentication and AWS S3 for optimized static asset delivery, hosting via AWS Amplify
- Powered by Node.js with Express.js and MongoDB for scalable and efficient data handling.

Task Tracker
- Built a task tracker app using React.
- Dealt with components, props, state, hooks, working with an API and more.

Stocks App
- Developed a Stock Monitoring App in Swift, featuring real-time stock tracking and seamless data updates via MS Finance API integration.
- Built data persistence features with Core Data, enabling storage of user preferences and stock classifications.

TECHNICAL SKILLS

- **Programming Languages**: Python, JavaScript, C/C++, Java, C#
- **Cloud & DevOps:** AWS, Azure, Docker, GitHub Actions
- **Web & Backend Development:** React.js, Express.js, REST APIs, HTML, CSS
- **Databases:** MySQL, MongoDB, Oracle SQL
- **Tools & Testing:** Git, Linux, Postman, Power BI, Power Automate, Power Apps
- **Development Tools:** MS Visual Studio, VS Code, XCode, CLion, Apache Netbeans, Android Studio
